

Supplementary Table 1. Improved categorization of infarct volumes after adjustment* of the reference map-based volume estimation versus volume measurement by using an image analyzer

Reference maps	Image analyzer				Total
	<21 mL	21 to <31 mL	31 to <51 mL	≥51 mL	
<21 mL	76	4	1	0	81
21 to <31 mL	0	2	2	0	4
31 to <51 mL	0	1	7	0	8
≥51 mL	0	0	0	37	37
Total	76	7	10	37	130

*Adjustment: multiply the sum of all estimated infarct volumes in each patient by 1.1, 1.2, 1.3, or 1.4 for the sum value of <21, 21 to <31, 31 to <51, or ≥51 mL, respectively.
