Prevalence of cSS shows the prevalence of cSS (irrespective of type), and, if reported, the prevalence of focal cSS and disseminated cSS. CROMIS-2-I ICH, The Clinical Relevance of Microbleeds in Stroke study-2-Intracerebral Haemorrhage; FETCH, finding the Etiology in Spontaneous Cerebral Hemorrhage; MGH, Massachusetts General Hospital; PITCH, Prognosis of IntraCerebral Haemorrhage; cSS, cortical superficial siderosis; dcSS, disseminated cortical superficial siderosis; fcSS, focal cortical superficial siderosis; ICH, intracerebral hemorrhage; MRI, magnetic resonance imaging; QA, total score of quality assessment; SD, standard deviation; SWI, Susceptibility-weighted imaging; UK, United Kingdom; USA, United States of America. *Median age and/or age range are reported instead of mean age (SD).
